La-Z-Boy® Rocker Recliner

The Genuine La-Z-Boy® Rocker Recliner is the most popular La-Z-Boy recliner sold. It has all the features that are important to our target consumer and is the standard to which all other recliners are compared. Several La-Z-Boy recliners come in three sizes as we all know one size does not fit all. The large and XL size recliners were designed for the taller person and to cater for those who require higher weight limits.

Construction Features and Benefits

Features	Benefits
Patented 4 sided 'unibody' seat frame design	Maximum strength and rigidity, reduces the stress on the mechanism = long life = saves money (cost of buying multiple chairs)
Solid steel drive shafts to activate the legrest	The legrest will not twist or fatigue and will stay aligned for thousands of opening and closing cycles = long life = saves money
Hand assembled mechanism	Easily replace any part without having to install a whole new mechanism. Service is quick and easy.
Lifetime warranty on the mechanism	Unparalleled in furniture and virtually any other product "What can you think of that you can buy that has a Lifetime warranty?" - Tells you so much about how long these chairs are going to last = saves money
Lockable removable back	The recliner back cushion can be removed and locked into place by releasing the toggles on the back bracket with a flat head screw driver for easy transport
Hardwood frame construction	Precision cut and assembled using interlocking joints for durable frame construction = long life = saves money
Solid hardwood rocker blocks	Provides smooth rocking motion – soothing and relaxing
Contour cut polyurethane foam	Is fitted to recliner to provide resilience and comfort in the seat and arm padding
Solid Foam Core	Is fitted and extended underneath the back cushions supporting the lower back and tail bone for full body lumbar support

Rocker Recliner Key Features and Benefits

Features	Benefits
Back and legrest work together or independently	You can sit with your feet up without reclining (e.g. to watch TV/read). Rock and recline without the legrest engaged
Smooth rocking motion (that can be 'locked')	Soothing and relaxing motion. If preferred, blocks can be added to prevent rocking (lifting the legrest also stops the rocking)
16 position TILT ratchet mechanism	Completely personalise your favourite seating position. Elevates feet in any seated position not just in full recline stimulating blood flow which provides greater relaxation and comfort. Full recline pitch position is approx. 20° from the floor
3 position locking legrest support levels	A choice of 3 positions to suit personal preference. Prevents the legrest from sagging or drooping under the weight of the users legs, ensuring legs are supported at all times.
Legrest is handle operated	No need to use legs to close legrest – saving that awkward/difficult pushing back with legs See more https://www.youtube.com/watch?v=cR4LdiN_kEI&feature=youtu.be
Total body lumbar support	Providing complete support to the entire body in all positions – comfortable and health benefits
Adjustable reclining tensions	Personalise the effort needed to recline into comfort by adjusting two wingnuts underneath the recliner – you make the chair bespoke to you - customised comfort!
Adjustable Headrest (some models)	You can tilt your head forward in 3 different position. Custom your comfort whilst sitting upright or in a reclined position when watching TV or reading.
La-Z-Boy Handle	Easy to use handle – no abs or leg strength required to operate the legrest To lower the legrest rotate the handle backward to the highest position (level 3) then rotate forward to close. Left hand operating handle available. This is a customer order to the factory. See more https://youtu.be/cR4LdiN_kEI

Recliner pitch

Adjustable Headrest

The adjustable headrest was introduced on several selected La-Z-Boy rocker recliners in 2019.

The manual 3 position locking adjustable headrest provides support in any of the reclining comfort positions whilst reading or watching a movie.

Refer to Adam, Anika, Harbor Town, Harbor Town XL, Mira and Pinnacle

How to use:

- To activate pull headrest forward with your hands into any of the three locking headrest comfort positions
- To close pull headrest in the third position (all the way forward) and push back into the neutral comfort position

How to demonstrate adjustable headrest with customer

- Demonstrate with customer or yourself in the chair in the reclined position
- Adjust headrest forward to any of the three locking positions

Reference

To find La-Z-Boy Rocker Recliner with adjustable headrest refer to code 30T***H (selected styles only)

La-Z-Boy Non Rock Recliner

- Non rock recliners are ideal for home cinemas and those with vertigo or other motion health issues. Non rock La-Z-Boy recliners offers all the comfort and structural features as you would expect from a La-Z-Boy recliner, however there are three key features to remember:
 - Non rock recliners do not rock
 - Non rock recliners still has the 3 position locking legrest
 - Non rock recliners loses the 16 tilt back rest positions

WARNING

Non rock timber blocks cannot be fitted on any power models i.e.

- ❖ lift chairs
- ❖ power xr models
- ❖ power xr+ models

See page 6 on how to install non rock timber blocks.

Important note:

You need to point out to customer that:

By installing timber blocks to your recliner it will lose the rocking and 16 tilt back recline functions.

You will still have the 3 position locking legrest feature.

Reference

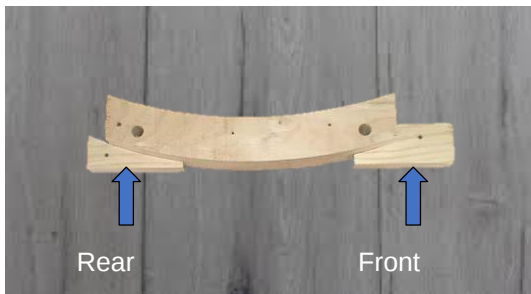

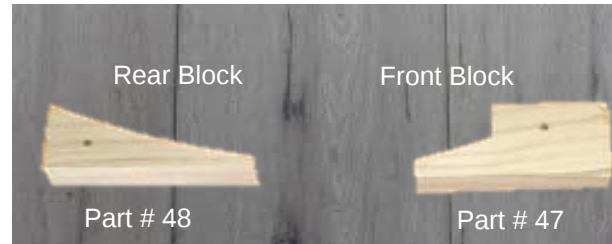

Non rock timber blocks can be placed on any 30T* models

How to install Non Rock Blocks

Supplied:

- ✓ 2 x Lock rock front (part 47)
- ✓ 2 x Lock rock rear (part 48)
- ✓ 4 x 32mm No. 8 multi head screws

χ Not supplied: ** Screwdriver ***Gluing not required***

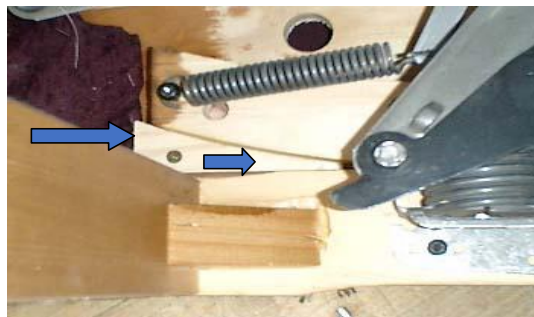

This is how the timber blocks are positioned against the rocker block

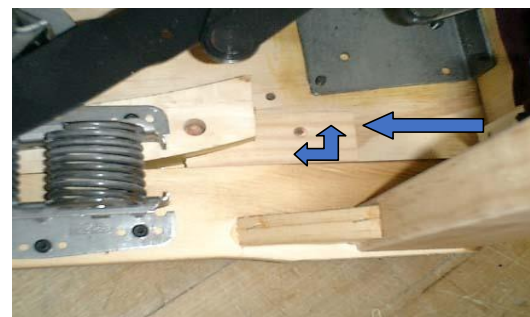

The front block must be attached first.

The front block must be attached first.

Place the block hard up against the rocker block, then screw into place

Finished assembly

La-Z-Boy Glideaway Recliner

La-Z-Boy's Glideaway recliners are great for smaller or limited living spaces. Our Glideaway Recliners with its many features and benefits still allows you to enjoy the full comfort of a La-Z-Boy Recliner even in the tightest spaces.

Construction Features and Benefits

Features	Benefits
Patented 4 sided 'unibody' seat frame design	Maximum strength and rigidity, reduces the stress on the mechanism = long life = saves money (cost of buying multiple chairs)
Solid steel drive shafts to activate the legrest	The legrest will not twist or fatigue and will stay aligned for thousands of opening and closing cycles = long life = saves money
Hand assembled mechanism	Easily replace any part without having to install a whole new mechanism. Service is quick and easy.
Lifetime warranty on the mechanism	Unparalleled in furniture and virtually any other product "What can you think of that you can buy that has a Lifetime warranty?" - Tells you so much about how long these chairs are going to last = saves money
Lockable removable back	The recliner back cushion can be removed and locked into place by releasing the toggles on the back bracket with a flat head screw driver for easy transport
Hardwood frame construction	Precision cut and assembled using interlocking joints for durable frame construction = long life = saves money
Contour cut polyurethane foam	Is fitted to recliner to provide resilience and comfort in the seat and arm padding
Solid Foam Core	Is fitted and extended underneath the back cushions supporting the lower back and tail bone for full body lumbar support

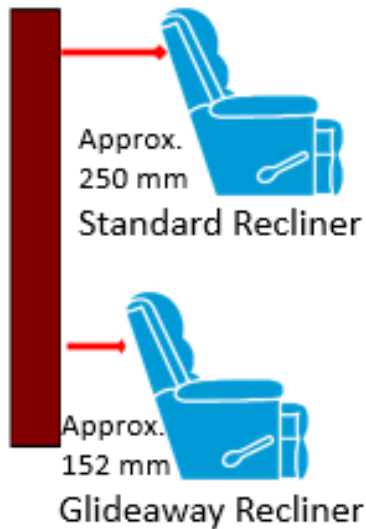

Glideaway Features and Benefits

Glideaway Features	Benefits	Restriction
Glideaway recliner requires 152mm space from the wall to fully recline	Great for smaller or limited living spaces – takes up less space in your room keeping that looking great	
Glideaway recliner does not rock	Ideal for those whom have a medical condition or simply do not like to rock	
Not a ratchet mechanism instead the Glideaway recliners use a solid steel wheel and track system that slides the seat and back forward as a unit as the back reclines.	The wheels in the track have ball bearings which provide a smooth, quiet gliding motion – that is Very easy to operate	The 16 natural reclining comfort positions is removed
Back and legrest work together or independently	Recline without the legrest engaged. Or you can sit with your feet up without reclining (e.g. to watch TV/read).	
Adjustable reclining tensions	Personalise the effort needed to recline into comfort by adjusting two wingnuts underneath the recliner – you make the chair bespoke to you - customised comfort!	
3 position locking legrest support levels	A choice of 3 positions to suit personal preference. Locking prevents the legrest from sagging or drooping under the weight of the users legs, ensuring legs are supported at all times	
legrest is handle operated	No need to use legs to close legrest, saving that awkward/difficult pushing back with legs	
Total body lumbar support	Solid foam cores are extended under the back cushions supporting the lower back and tailbone providing complete support to the entire body in all positions.	
Power Glideaway	The Glideaway has 4 easy to reach buttons located on the outside arm of the model. The buttons allows you to recline/ return the back, lift/ return the leg-rest, OR move the back and leg-rest at the same time.	Offered on the Pinnacle Glideaway AUS only
